

The main objective of the Bachelor of Social Work (BSW) degree is to provide graduates with a generic practice framework so that they are prepared to deliver services to various client constituencies at a level of competence suitable for beginning practice. The School of Social Work at St. Thomas places major emphasis on understanding the structural roots of social problems in Canadian society. The cause of much of the suffering and inequality in society is seen to be rooted in our social and economic order, and not in the individual, the family, or the subculture. All interventions are seen within the context of this understanding and, although much of social work practice is concerned with the immediate needs of individuals, the resolution of social problems is seen as necessarily involving interventions in our major social institutions.
